

1. Check the Windows Service Pack that is currently running on your XP Operating System.

Start -> Control Panel -> Add/Delete Programs.

Scroll down to the Microsoft components and check that the Microsoft Windows Service Pack installed. Windows Service Pack does not have to be installed to download the Visual Studio Redistributable.

2. If you have Windows Service Pack 2 installed, click the link to download Microsoft Visual C++ 2005 Service Pack 1 Redistributable Package

<http://www.microsoft.com/en-us/download/details.aspx?id=26347>

Redist: The MFC Security Update package has the most current redistributables for VS 2008 SP1.

Visual Studio 2005 (VC++ 8.0) SP1:

Visual Studio® 2005 Team Suite SP1:

This download installs Service Pack 1 for Microsoft® Visual Studio® 2005 Team Suite. Fixes in this Service Pack include stability, performance and security enhancements made in many areas of the product.

VS2005 SP1 Update for Vista:

The Visual Studio 2005 Service Pack 1 Update for Windows Vista addresses areas of Visual Studio impacted by Windows Vista enhancements. This update also applies to Windows 7, Windows Server 2008, and Windows Server 2008 R2.

VC++ Redistributable Packages:

The Microsoft Visual C++ 2005 SP1 Redistributable Package installs runtime components of Visual C++ Libraries required to run applications developed with Visual C++ SP1 on a computer that does not have Visual C++ 2005 SP1 installed. These packages install runtime components of C Runtime (CRT), Standard C++, ATL, MFC, OpenMP and MSDIA libraries. For libraries that support side-by-side deployment model (CRT, SCL, ATL, MFC, OpenMP) they are installed into the native assembly cache, also called WinSxS folder, on versions of Windows operating system that support side-by-side assemblies.

Microsoft Visual C++ 2005 Service Pack 1 Redistributable Package MFC Security Update:

3. If you don't have Windows Service Pack 2 installed, click the link to download Microsoft Visual C++ 2008 Redistributable Package

<http://www.microsoft.com/en-us/download/details.aspx?id=26368>

SP1 Redist.

Visual Studio 2008 (VC++ 9.0) SP1:

Visual Studio 2008 Service Pack 1 (Installer):

This download installs Visual Studio 2008 Service Pack 1 (SP1) and the .NET Framework 3.5 SP1. SP1 addresses issues that were found through a combination of customer and partner feedback, as well as internal testing. These service packs offer Visual Studio and .NET Framework users improvements in responsiveness, stability and performance.

VC++ Redistributable Packages:

The Microsoft Visual C++ 2008 SP1 Redistributable Package installs runtime components of Visual C++ Libraries required to run applications developed with Visual C++ SP1 on a computer that does not have Visual C++ 2008 SP1 installed. These packages install runtime components of C Runtime (CRT), Standard C++, ATL, MFC, OpenMP and MSDIA libraries. For libraries that support side-by-side deployment model (CRT, SCL, ATL, MFC, OpenMP) they are installed into the native assembly cache, also called WinSxS folder, on versions of Windows operating system that support side-by-side assemblies.

Microsoft Visual C++ 2008 Service Pack 1 Redistributable Package MFC Security Update:

A security issue has been identified leading to MFC application vulnerability your Windows-based system with Visual C++ 2008 Redist. The MFC Security Update package has the most current redistributables for VS 2008 SP1.

4. Once the installation is complete, you should be asked to restart your computer. Upon restart, try installing the DCD 2.3.5 client.

5. Click link to be directed to all of Microsoft Latest Visual C++ Downloads
